# Program Strategy Development

Program Strategy Development

The module introduces strategic thinking to programming through:

- the taking into account of the actions of other actors and the dynamics of the environment

- the clear distinction between the strategic and the operational levels, and

- the long-term nature of strategic action.

The module introduces the following strategic tools in programming:

➢ Geometry of Strategy

➢ Project Environment

➢ Actor Profiling

➢ Strategic Options

This training is based on GIZ-Capacity Works modules
