compliant

# Steering Structures

- This training is based on GIZ-Capacity Works modules.
- **Steering toward a goal:** International cooperation projects are based on agreed goals. The practical way to achieve these is not, however, a straight line drawn on a drawing board. We must find the path to the goal. Steering is the method used to find this path, together with stakeholders. The module provides five tools:
  - Steering Model
  - Key Topics
  - Change Projects
  - Debriefing
  - Consultancy Processes
